

Grade: K

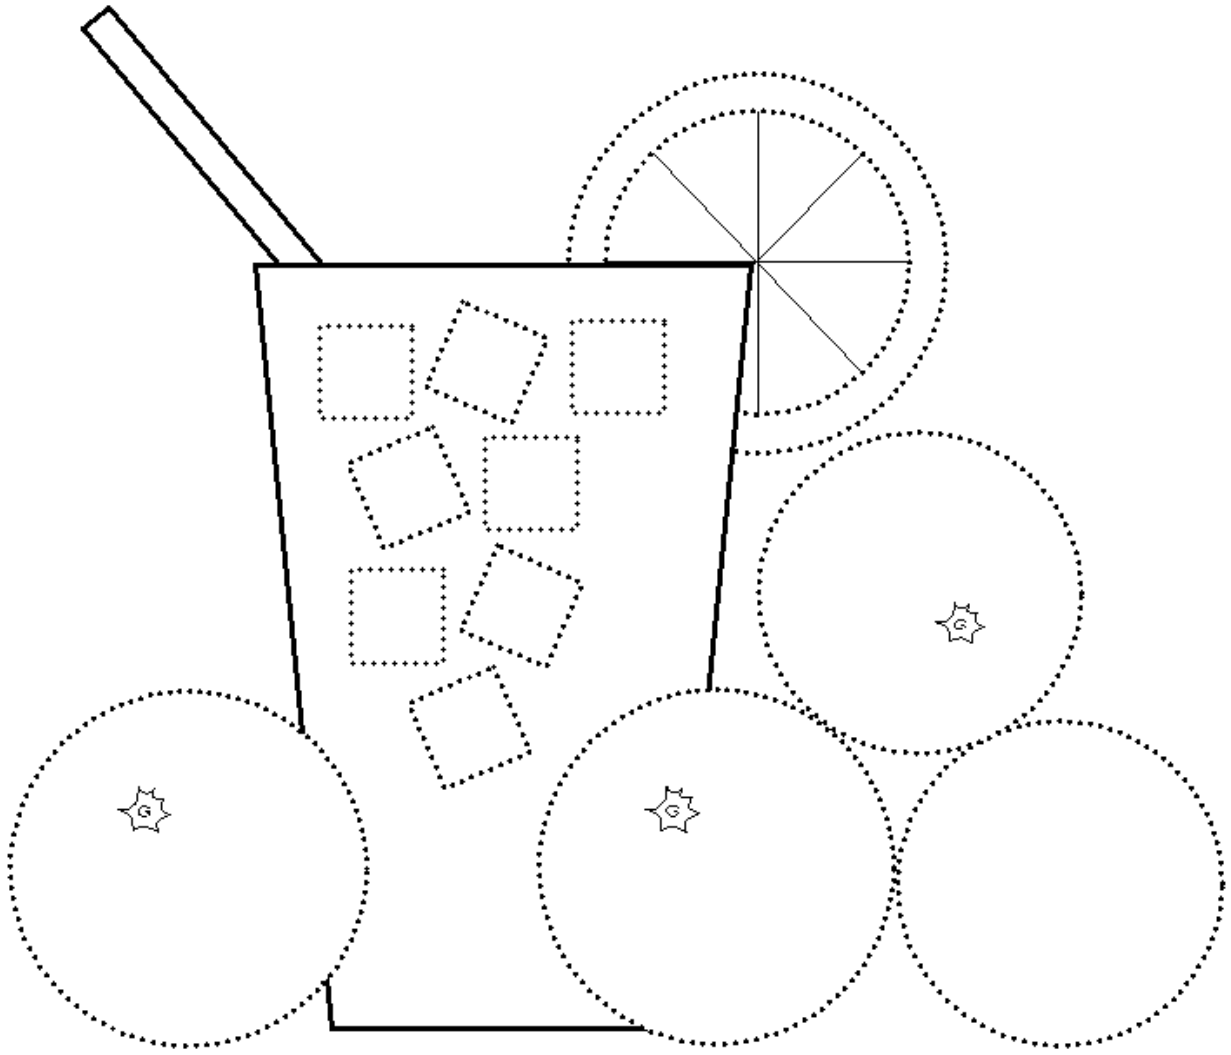

Subject: Math

Expectation(s): Can draw, sort, and classify basic shapes

Materials needed: Attached worksheet

Teaching and learning tips/strategies:

- Ask your student to describe the shapes they're drawing and coloring. When talking with your student about characteristics of shapes, try not to discourage their use of informal language (i.e. triangles have three "pointy parts"); introduce the correct terminology ("the pointy parts are called corners") while allowing them to use descriptions they understand.
- Help your student connect shapes to objects that surround them, such as a circle to a clock or a square to a table
- Don't forget to praise your student's effort!

Shapes and Colors: Trace the circles  and color them **orange**.

Trace the squares  and color them **blue**.
