

Grade: 2nd

Subject: Math

Expectation(s): Can add and subtract with money (up to \$1.00)

Materials needed: Attached worksheet, assorted coins (optional)

Teaching and learning tips/strategies:

- Bring in some change so your student can practice counting with physical manipulatives. Also, if they finish the worksheet quickly, you can have them practice counting to a given amount using real coins
- It may be a good idea to practice skip counting (particularly by 5s and 10s) before you start working with money. Being able to count by 5s and 10s is a crucial part of being fluent in counting money.
- Don't forget to praise your student's efforts!

Circle the coins that match the amount

(1) 66¢

(2) 31¢

(3) 42¢

(4) 17¢

(5) 30¢
