

Grade: 2nd

Subject: Math

Expectation(s): Can add and subtract with money (up to \$1.00)

Materials needed: Attached worksheet, assorted coins (optional)

Teaching and learning tips/strategies:

- Bring in some change so your student can practice counting with physical manipulatives. Also, if they finish the worksheet quickly, you can have them practice counting to a given amount using real coins
- Practice skip counting by 5s and 10s with your student before counting with money. This will make counting coins easier for them.
- Don't forget to praise your student's efforts!

Draw coins to match the amounts

\$1.00	73¢
32¢	48¢
19¢	84¢
